Dear Rabbits Unlimited,

Thank you for your generous donation to the National Multiple Sclerosis Society. This funding directly contributes to ongoing blood-based biomarker discovery research based on small molecules present in the serum metabolome. It is an honor to receive the Don Bell Memorial Fellowship, presented by Rabbits Unlimited. I am profoundly grateful to be a part of the National Multiple Sclerosis Society's and Rabbits Unlimited's efforts to stop disease progression, restore lost function, end multiple sclerosis for good—and to have your support which makes these efforts possible!

Sincerely,

A handwritten signature in cursive script that reads "Elina Misicka".
